

WASTE ITEMS THAT POSE A FIRE RISK

How to dispose of them safely

Gas Bottles – Placing discarded gas bottles out for kerbside recycling, in skips, or in DCC black refuse bags is very dangerous as the bottles can explode and start a fire.

Gas bottles no longer in use can be taken to the Green Island Landfill for recycling. There is a charge for this service.

There are options to swap or recertify your expired gas bottle. Check with your local gas bottle supplier.
